Average Waiting time

As we can see form the graph the total average waiting time for all the three mutual execution algorithms is compared. The TAS ME algorithm has the least average waiting time and bounded CAS ME algorithm has the most average waiting time.

Worst case waiting time

As we can see form the graph the worst-case waiting time for all the three mutual execution algorithms is compared. The bounded CAS ME algorithm has the least worst-case waiting time and TAS ME algorithm has the most worst case waiting time.
